eTracks Reporting System™

Fully-Automated State Reporting System

BusTracks™ is the only system on the market that offers BusTracks eTracks™, a fully automated process for preparing and submitting the Pennsylvania transportation subsidy report. Because BusTracks eTracks automatically creates the PDE-1049 EOY Transportation Report upload file and audit check reports, it takes minutes, not days, to complete this report.

The BusTracks eTracks process:

- ▶ Captures all subsidy elements in a single system
- ▶ Creates report in minutes, not days
- ▶ Eliminates manual data entry errors
- ▶ Provides automatic data entry into PDE eTran system using upload file
- ▶ Produces detailed audit check reports

BusTracks eTracks is designed to maximize your pupil transportation reimbursement by following the Pennsylvania guidelines for:

- ▶ Capturing actual odometer mileage to calculate approved daily miles
- ▶ Determining utilized passenger capacity miles
- ▶ Tracking actual number of school days for both public and non-public schools
- ▶ Tracking activity in bus miles, riders, and days
- ▶ Tracking layover and congested hours allowance

Zeroing in on the details of this report helps BusTracks users realize an average reimbursement that is 7 to 9 percent higher than non-users for the past two years. For the average Pennsylvania school district, this would result in an additional \$40,000 in transportation revenue.

The BusTracks eTracks process also links to BusTracks GPS PLUS™ for new solutions using GPS technology. Using BusTracks GPS PLUS and BusTracks eTracks together makes the transportation subsidy reporting process paperless. Using GPS PLUS also eliminates the need for bus drivers to keep daily logs, which allows them to concentrate on driving instead of recordkeeping.

In addition to being the only Pennsylvania-based company that offers these services, BusTracks has over 28 years of experience, and meets with state representatives to ensure that the system is on track and will continue meeting clients' needs.
